		13:30	End of Main Summit

**"Energizing Myanmar Oil/Gas Production & Electricity Supply Growth!"**

Several international firms are now preparing to step up activity and this anticipated increase in activity highlights the need for a local offshore supply base to improve economics and efficiency.

Many local and foreign firms are looking forward to this bankable and attractive infrastructure project, and a tender to build and operate multiple bases, to be issued by MOGE in the coming months.

To cope with the growing demand and while waiting for the existing refineries to be upgraded, new oil storage terminals and jetties have to be installed to facilitate the oil products imports. Local and foreign companies are looking to tap into the growing fuel import, retailing and oil storage business.

Attend **CMT's 4th Myanmar Oil & Gas Summit (MOGS)** for all these developments and the latest updates. Evaluate the opportunities in the country's upstream and downstream oil and gas sectors.

**Extensive networking benefits with new team of senior officials and vital sessions for discussion includes:**

- How Natural Gas, LNG and Mini-LNG can be integrated in Myanmar's energy portfolio
- Multilateral banks & energy majors' perspectives/aspiring roles in the burgeoning power sector
- PSC Updates on upstream oil/gas block tenders
- Latest development on the offshore & onshore E&P activities in Myanmar
- Myanmar's EPC markets & challenges in material sourcing & skilled employment
- Myanmar offshore supply base tender & updates
- Demand outlook for petroleum products (gasoline, lpg, etc) & growing import requirement, storage facilities & etc
- Case study of Thilawa fuel storage terminal & experience on fuel distribution in Myanmar
