## Day 1 - 15 Nov 2018, Thursday

08:00 Registration & Coffee

09:00 Chairman's Welcome & Remarks

### 09:10 Forward Plans on Meeting the Country's Growing Electricity Needs

- Plans to meet base-load and additional demand in peak hours/ major cities?
- Electricity tariff & policy reforms, etc.
- Government's view on opportunities for private investment & IPP participation in Myanmar's power sector? (Progress of the PPA, etc)

Senior Official

**Ministry of Electricity & Energy**

### 09:40 Myanmar LPG Demand Growth with Industrialization & Growth of Consumerism

Senior Official

**Ministry of Electricity & Energy**

### 10:10 How to Get to Close; Project Approvals & What You Can Expect

- Follow through on the entire legal process to financial closing
- Project approvals from the numerous ministries & issues to ensure bankable documents

*Dave Seibert, Senior Legal Adviser, Head Myanmar Energy, Mining, and Infrastructure Practice  
DFDL Mekong Group / Myanmar Thanlwin Legal Services*

10:40 Networking Coffee & Discussion

### 11:20 LNG to Power in Myanmar: Progress & Forward Development

Senior Official

**Ministry of Electricity & Energy**

### 11:50 Prospects of LPG & Other Fuels in Power Generation - Fuel Comparisons & Tariff Impact

- LPG as fuel for LPG to Power concept
- Exploring other alternative 'interim' fuel options for power generation
- Fuel comparisons & its impact on electricity tariffs
- Case study of Gas Engines v/s Gas Turbines for LPG & HFO/LFO

Mr. Nicolas Leong

*Business Development Manager, Energy Solutions, South East Asia  
Wartsila Singapore Pte Ltd*

*Jani Nurmi, Senior Financial Analyst  
Wartsila Singapore Pte Ltd*

12:20 Networking Luncheon & Discussion

### 14:00 Regulation on LPG Imports & Management in Myanmar

*Daw. Mya Aye San*

*Deputy Director (Head of Legal)*

**Myanmar Petrochemical Enterprise (MPE)**

### 14:30 South East Asian LPG Market Dynamics

- Overview of LPG demand and supply in SEA
- Import terminals in SEA: refrigerated and pressurized
- Comparison of domestic LPG prices in SEA

*Mr. James Cheng Weng Lye*

*NGL Analyst*

**FACTS Global Energy**

15:00 *Topic to be advised*

*Mr. Steve McBride, COO*

**Parami Energy Group of Companies**

15:30 Networking Tea & Discussion

### 16:00 Domestic LPG Production from Refineries - Capacity Outlook & Growth

*Daw. Kyu Kyu Myint*

*Head of Div - Production*

**Myanmar Petrochemical Enterprise (MPE)**

17:00 Discussion followed by **Networking Cocktail** for ALL Speakers & Participants

18:30 End of Day One

## Day 2 - 16 Nov 2018, Friday

09:00 Chairman's Remarks

### 09:10 Boosting LPG Adoption & Access in Myanmar

### 09:40 Financing the Development of LPG Availability & Sustainable Growth in Myanmar

- Trade Finance Program for LPG Trade Value Chain
  - LPG Import & Domestic Trade Financing
  - Global Trade Finance Banking Partners
- Mr. Siddharth Golikere  
Head of Corporate Banking  
Yoma Bank Ltd.*

10:10 Networking Coffee & Discussion

### 10:40 Efficient Logistics Management of LPG (Cylinder) Distribution in Myanmar

*Mr. Htun Htun Aung, Director  
Asia AVA Gas Company Limited*

## "Accelerate Import, Storage, Distribution & Marketing – LPG for Myanmar!"

*"Government strengthens aim of distributing LPG to a million households by 2020"*  
~ Myanmar Times, 29 Mar 2018

LPG can replace the use of electricity as a fuel for household cooking, which will help to conserve power as well as the environment. This will be beneficial to residents in rural areas, who do not have access to electricity, the minister said.

After distributing LPG to 150,000 households in 2017, the next step is to reach a million more by 2020. "The government and private sector will work together to expand the LPG industry in Myanmar so that it is able to supply the quantities needed," U Win Khaing said.

Myanmar does not have the infrastructure needed to produce its own LPG, thus providing opportunities for imports from the regional and international markets. The lack of infrastructure also give rise to investment opportunities for refineries upgrading and LPG logistics infrastructure.

Myanmar's LPG utilisation is currently the lowest among all the ASEAN countries, thus LPG awareness and usage promotion is in tandem with the supply chain development. At present, Myanmar imports around 5,000 tonnes to 7,000 tonnes of LPG, which is sufficient to meet just 5 percent of the total number of households in the country. Much of the imported LPG is now used for commercial purposes, such as in hotels, restaurants, tea shops and factories.

With the liberalization of Myanmar's LPG sector that allows private sector participation, the government aims to bring LPG to 150,000 out of the 10 million households by 2018 and 2 million households by 2020.

From export opportunities, LPG terminals, storage, distribution and safety, fresh new opportunities are opening up in Myanmar to support the growth of the LPG usage. Get fresh updates on these developments and progress at **CMT's Myanmar LPGtrade Summit**. Multiple benefits to affirm your participation:

- Up to 15 hours of face-to-face networking opportunities with local and regional companies in the LPG supply chain
- Growth prospects of LPG demand in Myanmar
- Status of the LNG to power plan
- Fuel & tariff comparison of LPG as fuel for power generation
- LPG importation framework & regulations
- SE Asia's LPG market dynamics and opportunities for Myanmar
- Peek into domestic LPG production forecast
- Roadmap to expand LPG imports & storage
- What's needed for an efficient LPG distribution & safety standards in cylinder management
- Funding options for LPG trade value chain
