 - 14:40 **Pellet Market Modelling - The Key to Strategic Decision Making**
 - The still largely independent European & Asian pellet markets are expected to show an increasing level of interdependency
 - Still outstanding investment decisions & future political directions add a high level of uncertainty to the market & resulting implications can only be analysed & understood through the use of detailed market modelling supported by solid market intelligence
 - Depending on the actual pellet demand development in Japan as well as further political support for additional coal to Biomass conversions in Europe, wood pellet market dynamics might shift considerably
 - Solid market intelligence in combination with sophisticated market modelling capabilities allows for the development & implementation of optimized wood pellet sourcing strategies

Sakata 50MW Biomass Power Plants at Sakata Rinkai Industrial Park, Yamagata Prefecture (Utilizing domestic wood chips & imported wood pellets)

The Sakata Biomass Power Plant was constructed in the Sakata Rinkai Industrial Park facing Sakata North Port. It will be operated by Summit Sakata Power Corporation. The 50 MW biomass power plant will be the largest of its kind in Yamagata Prefecture and also one of the largest of its kind in the Tohoku region. Biomass fuels, such as Japanese wood chips and imported wood pellets, will be procured through Sumitomo Corporation. The Japanese wood chips will comprise unused wood materials and timber off-cuts mainly generated in Yamagata Prefecture and will cover about 40% of the biomass fuel, while wood pellets imported from across the world will also be used as fuel. Electricity generated at the plant will be sold to power consumers through Summit Energy.

Celebrating the 10th edition of the “Asia Biomass Markets’ Powerhouse Meet” in Tokyo this May.

Pivotal in shaping market direction, CMT is pleased to host our **10th Biomass Pellet Trade & Power (13 – 16 May 2019)** at **Tokyo Marriott Shinagawa**. With strong support from the Japanese IPPs, utilities and trading houses, the 4-days summit is expected to attract over 350 participants in the global biomass industry.

CMT’s 10th Biomass Pellet Trade & Power zooms into the Japanese and South Korean biomass power developments. From biomass sustainability and certification, to demand development, supply logistics, technologies and financing, the comprehensive program with expert speakers panel is ready with the latest industry insights and engaging panel discussion.

What to expect at Asia’s Must-Attend Biomass Trade & Power event

- **24+ hours of content** – Engage in presentations & discussions on biomass demand & logistics, to analysing economic potentials from the efficient biomass supply chain management, and case studies.
- **Addressing pertinent issues in sustainability** – Engage in the full-day pre-conference discussion with policies advisors in Japan and South Korea, expert large-scale biomass co-firing utilities, biomass suppliers and certification panel.
- **350+ participants & 35+ countries represented** - Meet international partners and key industry practitioners
- **>Meet the Buyers & Users** – the only biomass event in Asia that host 50% attendance from power utilities, IPPs and trading houses in Japan & South Korea
- **70% are senior-level executives** – The must-attend keynote with senior officials & executives; Network and establish contact with key influencers and decision makers.
- **20+ networking hours** - Take advantage of CMT Connect, & many opportunities for you to network with fellow delegates and speakers during refreshment breaks, lunch, cocktail receptions, as well as the pre-conference workshop and post-conference site visit.
- **Operational biomass power plant experience** - Visit the all-new 50MW Sakata Biomass Power Plant, powered by imported wood pellets
- **Engage yourself with the entire supply chain, all in 4-days** - The full bundle pack enables you to access the 4-days event to gain completely
- **Start networking before the conference begins** - Take advantage of CMT Connect and start planning your meetings before 13 May 2019.
