

A 2-day intensive course on

Effective Contracts Administration & Supplier Management: *Improving Procurement Performance & Cost Efficiency*

27 - 28 August 2008 ■ JW Marriott Hotel, Kuala Lumpur

COURSE HIGHLIGHTS:

- Principles Of Effective Procurement
- Managing Procurement By Contracts
- The Contract Drafting
- The Essential Preliminaries Of A Contract
- Risk Management
- Selection Of Suppliers
- Contract Performance And Progress Monitoring
- Supplier Development
- Software To Manage Contracts

INTRODUCTION

Procurement is an essential function that contributes to cost efficiencies of an organization. Some companies major spending is in the areas of materials purchase, either, direct or indirect, and could run into hundreds of millions of dollars annually. When a robust system of managing these funds is absent, there could be a total chaos; fraud, unethical behaviours and maverick purchases.

By formulating a carefully drafted contract that creates a win-win situation for all parties of a business, major issues, conflicts and inefficiencies are driven out of the equation. The only way then is to understand how contracts help to achieve company strategies.

COURSE OBJECTIVES

Effectively negotiating, executing and controlling agreements with suppliers is an important task, yet many organizations do a poor job of managing contracts. This failure leads to protracted contract development and negotiation cycles, improper contract approvals, limited contract visibility and control, and, an inability to ensure that suppliers comply with established contract terms.

This 2-day course addresses all these issues and show participants how a planned contract management process ensures that inefficiencies are addressed at the earliest stage possible. Through interactive supplier-buyer participation and the management of the contract throughout its life cycle, supplier-buyer relationship is maintained at the highest level.

WHAT YOU WILL LEARN

1. Understanding The Essentials Of Procurement
2. How To Manage Procurement By Contracts
3. How To Design And Draft A Contract
4. The Essential Preliminaries Of A Contract
5. Risk Management
6. Selection Of Suppliers
7. Contract Performance And Progress Monitoring
8. Supplier Development
9. Software To Manage Contracts

Program topics, speakers and schedules published herein are confirmed as at printing time. Please refer to the event's timetable page at www.cmtevents.com for the most up-to-date information.
