

A 2-day intensive course on

Corporate Financial Modeling & Analysis with Excel

23-24 March 2009 | JW Marriott Hotel Kuala Lumpur

INTRODUCTION

The two-day Financial Model Analysis with Excel course takes a hands-on approach to a comprehensive set of financial modeling and valuation techniques.

The Financial Model Analysis with Excel course is highly practical and emphasizes the techniques needed to implement the relevant financial concepts. Case studies and other examples are used to illustrate various aspects of company valuation and other related issues. Participants will work with computers during the course, so that they can practice as they learn.

FOCUSING ON

- What Is Financial Modeling And Its Objectives?
- How To Avoid The Pitfalls Of A Poorly Designed Spreadsheet
- Excel Spreadsheet Fundamentals
- Basic Valuation Techniques and Excel Applications
- DCF, Cost of Capital and Real Options

WHO SHOULD ATTEND

The course assumes that **participants have a background in finance and accounting**. Since the implementation of most valuation requires a spreadsheet, **participants must have experience in using Excel** (advanced techniques, where necessary, will be explained during the course).

- Financial Managers
- Financial Analysts
- Bankers
- Portfolio Managers
- Accountants
- General Managers who need to use financial modeling to measure business performance
- Those who are involved in financial and accounting related fields
