19th PHENOL/ACETONE & DERIVATIVES MARKETS

SCAN ME

Ukraine-Russia war, rising interest rates, increasing recession fear, China lockdowns to contain Covid-19, volatile oil prices are causing lots of uncertainty in the global markets. Where is the world economy heading? Will oil price stabilize at USD100/barrel?

Mitsui Chemicals ships bio-based phenol for first time in Asia.

www.fuelsandlubes.com, 16/2/22

INEOS Phenol launches new lower carbon bio product line to be called INVIRIDISTM, for its phenol, acetone and alphas-methylstyrene business.

www.ineos.com, 14/6/22

Cepsa Quimica launches production of sustainable phenol feedstock.

www.mrchub.com, 26/4/22

To achieve carbon neutrality by 2050, many companies in the Phenol value chain are moving away from fossil-based materials towards more sustainable solutions. Borealis, Mitsui Chemical, Cepsa Quimica, Ineos Phenol, and more are launching bio-based Phenol, bio-Cumene to meet growing demand. Is there sufficient renewable feedstock to meet the demand? If crude prices remain high, could biobased materials and plastics gain traction and be competitive?

Shipping issues continue to plague the chemicals industry, as delays, shortages, and Covid outbreak exacerbate global trade chaos, causing freight rates to remain high! It is forecasted that rates will continue to stay high into 2023! Find out more from Eastport Maritime where the freight market is heading.

CMT's 19th Phenol / Acetone & Derivatives Hybrid Conference takes place in Singapore on 21-22 September 2022. Register with your team to enjoy group discount!
