Sustainable PACKAGING SOLUTIONS

Sustainable Packaging is set to be a significant 'trend' across multiple markets. Many businesses are actively developing ambitious goals and strategies to embrace a circular economy. Numerous initiatives have been launched by packaging manufacturers and brand owners to address waste and find sustainable alternatives. Being innovative in developing long-term solutions is critical to reducing industry's carbon footprint, particularly through material selection & design.

Mars switching from plastic to paper for certain candy bars in Australia. 1/12/22, www.plasticsnews.com

Coca-Cola Philippines continues its efforts towards sustainable packaging as it looks to transition the packaging of key brands to 100 percent recycled PET plastic packaging, excluding caps and labels by next year. 15/10/22, www.philstar.com

SCGC Introduces Eco-Friendly Refillable Packaging Based on CE, Partnering with Unilever and Tops Market. 29/7/22, www.scgchemicals.com

CMT's Sustainable Packaging Solutions conference on 21 - 22 Feb 2023 in Bangkok will provide updates on how brand owners are progressing toward sustainable packaging within their organizations, as well as packaging material innovations and solutions that are environmentally friendly and reduce waste.
