PPWR will increase plastic packaging waste by "up to 1500%" for takeaway, finds McDonald's study ~ March 2023, *Packaging Insights*

Packaging suppliers rethink raw materials and enhance traceability amid climate change fears ~ March 2023, *Packaging Insights*

Paper and fiber based packaging is gaining popularity as the world moves away from single-use plastics and sustainability. Conveniently recyclable, fiber-based material is a natural and sustainable alternative to fossil-based ones. To meet the growing functional requirement for more packaging applications, the fiber based packaging supply chain is anchoring partnerships, in R&D, investments and etc, to realise the commercialisation of high performance packaging solution coupled with functional barrier properties, durability, food-contact safety compliance and etc, suitable for both food and non-food applications.

Join us and our industry experts panel at CMT's **Functional Fiber-Based Material & Packaging**, on **10 - 12 Oct 2023** in **Hilton Rotterdam Weena 10 Rotterdam - 3012 CM**. The 3-days agenda will walk you through the current development on barrier application on paper packaging for food-contact, molded fiber materials, technologies and solutions, as well as end of life options for these fiber based packaging, recycling and new approaches. This is the ideal event to assess the latest industry updates on fiber based packaging in food and non food applications, and a perfect platform for all speakers and participants to discuss ideas and opportunities, as well as network with high-level players from across the supply chain.

Day 1 - 10 October 2023

3rd Sustainable Barrier Paper Packaging for Food Contact

Day 2 - 11 October 2023

3rd Sustainable Molded Fiber Packaging Solutions

Day 3 - 12 October 2023

Fiber-Based Packaging: End-of-Life & Recycling
