Updates on UK Plastics packaging regulations towards a sustainable circular economy

The UK plastics industry wants all plastic packaging and single-use items re-used, recycled and/or recovered by 2030. Leading brands and retailers have already committed to using only reusable, recyclable or compostable packaging by 2025.

The industry has been flushed with new legislations, packaging scheme reforms - with the objective of encouraging recycling.

1st April 2022 - UK-wide Plastic Packaging Tax came into effect where plastic packaging products which contain less than 30% of recycled content are subject to the tax.

In Oct 2023 - the ban of Single Use Plastics caused disarray for many packaging suppliers of the food service industry.

Still to come, the new EPR that replaces the current Packaging Waste Regulations and the payment of the packaging fees to start in 2025.

The UK Government is also expected to roll out a Deposit Return Scheme (DRS) on drink bottles sometime in 2024.

How effective are these changes in tackling plastic packaging waste & innovation of new materials and processes?

Join us at the **UK Circular Plastics Packaging** event in **Manchester** on the **12-13th March 2024** as we delve into the dynamic world of two-day symposium that brings together industry leaders, experts, and innovators to explore the latest developments, challenges, and solutions in the realm of sustainable plastic packaging.

Key highlights:

- Progress and challenges of the UK Plastics Pact roadmap to 2025
- Future trajectory of Packaging Recycling Notes within the UK
- OPRL guides us through the intricacies of recycling labels
- Updates us on the Flexible Plastics Fund initiative, shedding light on how it adds value to hard-to-recycle plastics and flexible materials.
- The Food Standards Agency UK, explores the latest UK regulations for Food Contact packaging materials, with a special focus on recycled plastics and biodegradable/compostable packaging.
- A thought-provoking Panel Discussion follows, asking the pivotal question: Can the UK's new packaging EPF reform finally get off the ground?
- The mechanical recycling of food-grade rPP at scale

- CO-OP's perspective on achieving 100% recyclable packaging.
 - Introducing novel advanced plastic recycling technology using hot compressed water to selectively depolymerize end-of-life plastics,
 - Nextek, explores the creation of a circular economy for food-grade polypropylene.
 - Developments in de-inking post-industrial films
 - Panel Discussion on stepping up the refillable revolution,
 - Cutting-edge innovations to improve recycling rates featuring AI and waste analytics digital platform, Robotics sorting
- And many more.

Don't delay – Register with hafizah@cmtsp.com.sg to secure your seats now.

The conference will share a half-day session with **2nd Biodegradable & Compostable Plastics** conference which will take place on **12 March morning**.

Maximize your learning and networking opportunities by registering for both conferences and take advantage of our bundled discounts to delve into the complete spectrum of sustainable solutions across the plastics industry.

More details of 2nd Biodegradable & Compostable Plastics can be viewed here: <https://www.cmtevents.com/eventschedule.aspx?ev=240308&>

EXHIBITOR / SPONSOR

This event is an excellent platform to promote your organization to influential players and investors in the industry. Sponsorship opportunities available include Corporate, Exclusive luncheon & Cocktail sponsor.

Contact cynthia@cmtsp.com.sg for more information. Exhibition / catalogue display can be arranged upon request.
