## Packaging waste policies, collaborative efforts and recycling technologies shaping the future of circular plastics in Asia

**3rd Circular Plastics ASIA** which evolved from CMT's annual PET Asia series is set to convene this year in **Seoul, South Korea**.

With a growing emphasis on sustainability and environmental responsibility, the event aims to bring together stakeholders from across the plastics industry in the Asian region to discuss innovative solutions and strategies for achieving a circular economy in plastics packaging.

As South Korea emerges as a leader in the circularity of plastics – implementing initiatives to reduce plastics consumption, announcing advanced plastic recycling projects and developing new technologies, hosting the conference in Seoul underscores the country's commitment to addressing plastic waste and promoting sustainable practices.

The conference includes separately bookable Site Visits to **Samyang Ecotech** and **BGF Ecocycle** (part of the BGF Retail group – a leading convenience store in Korea with its own CU brand).

Participants will get to see firsthand insights into their recycling processes, technologies, and operations.

**This tour will sell out fast with limited seats.** Only conference participants are entitled to this tour. Contact [hafizah@cmtsp.com.sg](mailto:hafizah@cmtsp.com.sg) to book NOW.
