The **8th Biomass Trade & Power Europe Conference** is set to take place in **Copenhagen** on **February 25-26, 2025**, serving as a key gathering for industry stakeholders focused on the future of biomass in the European energy landscape.

The agenda will address critical discussion topics such as the demand for industrial wood pellets post-2027, the economics of biomass production across various regions. Participants will assess the progress in Bioenergy with Carbon Capture and Storage (BECCS) and delve into emerging markets beyond traditional power and heat, including biochar, biocoal, biocarbon, and Sustainable Aviation Fuel (SAF). The conference will also highlight the implications of sustainability requirements from the European Union Deforestation Regulation (EUDR) and the Renewable Energy Directive III (REDIII) on the biomass sector.

The event offers unparalleled networking opportunities, allowing attendees to connect with industry leaders, potential partners, and innovators. Additionally, exhibiting or sponsoring at the conference provides businesses with enhanced visibility, direct access to a targeted audience, and the chance to showcase their products and services, making it an invaluable investment for growth and collaboration in the biomass industry.
