

ORGANISED BY

After IMO-2020 and COVID-19 pandemic, has the shipping industry build its resilience for another challenge? The uncertain economic climate combined with fast approaching dateline on tightening environmental legislations, is definitely making fuel switching a tough one. The inclusion of greenhouse gases such CO2 in the list of pollutants only complicates the choice for the right alternative marine fuel.

"Reducing emissions from large transoceanic ships will be particularly onerous, requiring large investments and co-ordinated efforts among fuel suppliers, ports, shipbuilders and shippers."
- *Energy Technology Perspectives 2020, IEA, 11 September*

Alternative shipping fuels, such as LNG, biofuels, hydrogen, methanol, ammonia are proposed as solution to decarbonise shipping. R&D and commercialisation is required to ensure sustainability, and security of fuel supply for the maritime industry.

Sign up for this 90-minutes webinar session and engage with product and maritime stakeholders to assess the pathway for alternative marine to meet IMO's GHG reduction target by 2050. The panel is set to discuss on low carbon fuels qualities and features that shippers are looking for in the fuel switch.

CMT WEBINAR ON

Alternative Marine Fuels: Where's the Industry Heading in Decarbonizing Shipping?

27 OCT 2020, 15:30 SGT (GMT+8) / 08:30 CET

SPEAKERS

ADRIAN TOLSON
Director,
BLUE Insight Lead

FRÉDÉRIC MEYER
Director, Strategy,
**Total Marine Fuels
Global Solutions**

PRASHANTH ATHIPAR
Principal Technical Maritime,
Supply Chain Excellence,
BHP

TIMOTHY CHAN
Manager of Government
Relations & Business Development
(Asia/Middle East),
Methanol Institute

DIRK KRONEMEIJER
CEO
GoodFuels

ROB STEVENS
VP Ammonia Energy
& Shipping Fuel
Yara International ASA

27 OCT 2020, TUESDAY

15:30 CMT's Welcome & Moderator's Remarks

15:40 **Decarbonizing Maritime Transport - Options for Fuels**
Adrian Tolson, Director, **Blue Insight**

15:55 **LNG for Shipping (Topic to be Advised)**
Frederic Meyer, Director, Strategy
Total Marine Fuels Global Solutions

16:10 **The Fast Rise of Marine Biofuels**
Dirk Kronemeijer, CEO, **GoodFuels**

16:25 **Opportunities & Drawbacks of Biofuels as a Marine Fuel Option**
Prashanth Athipar, Principal Technical Maritime,
Supply Chain Excellence, **BHP**

16:40 **Best Practices in Deploying Methanol for Shipping**
Timothy Chan, Manager of Government Relations &
Business Development (Asia/Middle East)
Methanol Institute

16:55 **Ammonia Energy to Close the Gap**
Rob Stevens, VP Ammonia Energy & Shipping Fuel
Yara International ASA

17:25 **Panel Discussion: Where's the Industry Heading in Decarbonizing Shipping?**
Moderated by:
Adrian Tolson, Director, **Blue Insight**

Frederic Meyer, Director, Strategy,
Total Marine Fuels Global Solutions

Prashanth Athipar, Principal Technical Maritime,
Supply Chain Excellence, **BHP**

Timothy Chan, Manager of Government Relations &
Business Development (Asia/Middle East)
Methanol Institute

Dirk Kronemeijer, CEO, **GoodFuels**

Rob Stevens, VP Ammonia Energy & Shipping Fuel
Yara International ASA

17:55 Concluding Remarks & End of Webinar

1-to-1 Networking will be Available for ALL Registered Participants, from 27th Oct to 2nd Nov 2020
